Index of Subjects

Note. Short Communications are distinguished by C. Pages in *Proceedings of The Biochemical Society* are distinguished by P.

Acacia georginae, fluoride metabolism in (Peters, R. A., Murray, L. R. & Shorthouse, M.) 724

Acetamide, hydrolysis and transfer of acyl group of, by *Pseudomonas aeruginosa* amidase (McFarlane, N. D., Brammar, W. J. & Clarke, P. H.) 24C

Acetate thiokinase, activities of, in livers of normal and diabetic rats (Kornacker, M. S. & Lowenstein, J. M.) 832

Acetyl-coenzyme A, source of error in the assay of (Pearson, D. J.) 23C

Acetyl groups, formation and fate of, from glucose in the isolated perfused goat udder (Hardwick, D. C.) 46P

Fn-Actin, partial characterization of (Graham, G. N. & Wilson, R.) 7P

Actinomycin D, extracellular ribonuclease formation in *Bacillus subtilis* and its stimulation by (Coleman, G. & Elliott, W. H.) 699

Acylamide amidohydrolase, esterase activity of, from *Pseudomonas aeruginosa* (McFarlane, N. D., Brammar, W. J. & Clarke, P. H.) 24C

Adenine nucleotides, effect of atractylate and oligomycin on behaviour of mitochondria towards (Chappell, J. B. & Crofts, A. R.) 707

Adenine nucleotides, effects of, on pyruvate metabolism in rat liver (Berry, M. N.) 587

Adenosine 5′-pyrophosphate, preparation of, by a non-enzymic method (Dawson, R. M. C., Ford, M. & Eichberg, J.) 104

Adenosine triphosphatase, activity of, in adrenal chromaffin granules (Banks, P.) 490

5′-Adenylic deaminase during development in skeletal muscle (Kendrick-Jones, J. & Perry, S. V.) 48P

Adrenal chromaffin granules, adenosine-triphosphatase activity of (Banks, P.) 490

Adrenal gland, soluble protein from chromaffin granules of (Smith, A. D. & Winkler, H.) 42P

Adrenalectomy, effect of, on concentration and oxidoreduction state of the nicotinamide nucleotides of rat liver (Greenbaum, A. L., Clark, J. B. & McLean, P.) 167

Aedes aegypti, *see* Mosquito

Aflatoxin, inhibition of amino acid activation in liver and *Escherichia coli* preparations *in vitro* by (Smith, R. H.) 43P

Aflatoxin, possible role of kojic acid in the production of, by *Aspergillus flavus* (Heathcote, J. G., Child, J. J. & Dutton, M. F.) 23P

Albumin, bovine serum, adsorption of antibody to, by chopped guinea-pig lung and subsequent binding of bovine serum albumin (King, C. A. & Francis, G. E.) 23P

Albumin, human serum, isolation and study of a fragment of, containing one of the antigenic sites of the whole molecule (Lapresle, C. & Webb, T.) 245

Albumin, measurement of synthesis rates of, in rabbits (McFarlane, A. S., Irons, L., Koj, A. & Regoeczi, E.) 536

Alcohol dehydrogenase, liver, activity of, with nicotinamide–adenine dinucleotide phosphate as coenzyme (Dalziel, K. & Dickinson, F. M.) 311

Aldolase, evidence for extracellular activity of, in the isolated perfused rat heart (Williamson, J. R. & DiPietro, D. L.) 226

Amidase, esterase activity of, of *Pseudomonas aeruginosa* (McFarlane, N. D., Brammar, W. J. & Clarke, P. H.) 24C

Amino acid, inhibition of, activation of, in liver and *Escherichia coli* preparations by aflatoxin *in vitro* (Smith, R. H.) 43P

Amino acid, metabolism of, nucleic acid and, in the larva of the blowfly (*Calliphora erythrocephala*) (Price, G. M.) 39P

L-Amino acid oxidase, nature of enzyme–substrate complexes formed with, from snake venom (Zeller, E. A., Ramachander, G., Fleisher, G. A., Ishimaru, T. & Zeller, V.) 262

Amino acid sequences of peptides adjacent to carbohydrate–polypeptide linkages of α_1-acid glycoprotein (Satake, M., Okuyama, T., Ishihara, K. & Schmid, K.) 749

Amino acid, uptake of, by the lactating goat mammary gland (Mepham, T. B. & Linzell, J. L.) 47P

Amino acids, interaction of aspartate aminotransferase with (Scotto, P. & Scardi, V.) 657

Amino acids, ^{14}C-labelled, small-scale isolation of ferritin for the assay of the incorporation of (Drysdale, J. W. & Munro, H. N.) 851

Amino acids, production of, by rat-liver mitochondria and other subcellular fractions (Alberti, K. G. M. M. & Bartley, W.) 641

Amino acids, 'unnatural', uptake of, by carrot root slices (Evered, D. F. & Snell, D. E. M.) 28P

o-Aminophenol and *p*-nitrophenol, differences in the conjugation of, by the uridine diphosphate transglucuronylase of mouse-liver homogenates (Storey, I. D. E.) 209

Ammonia, oxidation of, by *Nitrosomonas* (Anderson, J. H.) 688

Ammonia, production of, by starved *Escherichia coli* (Dawes, E. A. & Ribbons, D. W.) 332

Ammonium ions, effect of, on the action of gramicidin on isolated liver mitochondria (Chappell, J. B. & Crofts, A. R.) 393

Ammonium ions, effect of, on the glucose-dependent active transport of L-histidine in slices of rat-brain cortex (De Almeida, D. F., Chain, E. B. & Pocchiari, F.) 793

Amylase, anomalous reduction of alkaline 3,5-dinitrosalicylate by oligosaccharides and its bearing on studies of (Robyt, J. F. & Whelan, W. J.) 10P

β-Amylase, crystalline, an enzymic impurity in, from sweet potato (Lee, E. Y. C. & Whelan, W. J.) 27P

β-Amylase, purification and characterization of, from soya beans (Gertler, A. & Birk, Y.) 621

Androsterone sulphate, extraction of plasma 3-hydroxy-17-oxo steroid sulphates and the measurement of (McKenna, J. & Rippon, A. E.) 107

Anthracene, ring-fission mechanism for oxidative metabolism of phenanthrene and, by soil pseudomonads (Evans, W. C., Fernley, H. N. & Griffiths, E.) 819

Antifolic acid drugs, inhibition of nicotinamide–adenine dinucleotide-linked 3α-hydroxy steroid dehydrogenase by (Lambe, R. F. & Williams, D. C.) 847

Antipurine drugs, inhibition of nicotinamide–adenine dinucleotide-linked 3α-hydroxy steroid dehydrogenase by (Lambe, R. F. & Williams, D. C.) 847

Aorta, distribution of collagen, elastin and carbohydrate of, in different species (Grant, R. A.) 53P

Apomyoglobin and metmyoglobin, conformational changes in, due to combination with antibody (Crumpton, M. J.) 21P

Aromatic compounds, insect metabolism of (Brunet, P. C. J.) 38P

Ascites-hepatoma cells, Novikoff, Pasteur effect in (Nigam, V. N.) 1C

Ascites tumour cells, thiol groups in deoxyribonucleic acid nucleotidyltransferase from (Keir, H. M. & Shepherd, J. B.) 483
Ascorbate oxidase, development of, in mature storage tissue of the Jerusalem artichoke (Edelman, J. & Hall, M. A.) 403
Ascorbic acid, effect of starvation in various animals on the synthesis of, from glucuronolactone and gulonate (Stirpe, F., Comporti, M. & Della Corte, E.) 363
Ascorbic acid, effect of starvation on the enzymes for the synthesis of, from glucuronic acid (Stirpe, F. & Comporti, M.) 354
Aspartate aminotransferase, interaction of, with amino acids (Scotto, P. & Scardi, V.) 657
Aspartate–2-oxoglutarate aminotransferase, binding of pyridoxal phosphate and substrates to (Fasella, P.) 2P
Aspergillus flavus, possible role of kojic acid in the production of aflatoxin by (Heathcote, J. G., Child, J. J. & Dutton, M. F.) 23P
Aspergillus fumigatus, incorporation of 6-methylsalicylic acid into fumigatin (3-hydroxy-4-methoxytoluquinone) in (Packter, N. M. & Steward, M. W.) 4P
Aspergillus nidulans, control of choline sulphatase in (Scott, J. & Spencer, B.) 50P
Atractylate, effect of oligomycin and, on the behaviour of mitochondria towards adenine nucleotides (Chappell, J. B. & Crofts, A. R.) 707
Aurantiogliocladin, production of, in *Gliocladium roseum* (Steward, M. W. & Packter, N. M.) 26C

Bacillus megaterium, action of hot formamide on cell walls of (Perkins, H. R.) 876
Bacillus subtilis, extracellular ribonuclease formation in, and its stimulation by actinomycin D (Coleman, G. & Elliott, W. H.) 699
Bacteria, Gram-positive, occurrence of glycolipids in (Brundish, D. E., Shaw, N. & Baddiley, J.) 21C
Bacteriophage deoxyribonucleic acids, T-even, glucosylated nucleotide sequences from (Lunt, M. R. & Newton, E. A.) 717
Bacteriophages, ribonucleic acid, determination of base ratios of, specific to *Escherichia coli* (Bishop, D. H. L. & Bradley, D. E.) 82
Baleen plates, chemical composition of, keratin fractions from (Fincham, A. G. & Graham, G. N.) 6P
Base ratios, determination of, of six ribonucleic acid bacteriophages specific to *Escherichia coli* (Bishop, D. H. L. & Bradley, D. E.) 82
Bile acids, biliary, excretion of, in the isolated perfused rat liver (Percy-Robb, I. W. & Boyd, G. S.) 54P
Bilirubin, 'shunt', extent of, in the newborn infant measured by the administration of [^{15}N]glycine (Vest, M., Strebel, L. & Hauenstein, D.) 11C
Biotin, effect of, of homologues, on ornithine carbamoyltransferase synthesis in yeast (Dixon, B. & Rose, A. H.) 25P
Blood, ox, methionyl-lysyl-bradykinin from (Elliott, D. F. & Lewis, G. P.) 437
Blowfly (*Calliphora erythrocephala*), action of valone (2-isovalerylindane-1,3-dione) on respiration and phosphorylation in flight-muscle sarcosomes of (Ray, J. W.) 40P
Blowfly (*Calliphora erythrocephala*), amino acid and nucleic acid metabolism in the larva of (Price, G. M.) 39P
Bone, effect of manganese on calcification of (Tal, E. & Guggenheim, K.) 94
Bone marrow, human, lipid composition of (Wajda, M.) 252
Bradykinin, comparison of biological properties of an ox-plasma kinin and (Elliott, D. F. & Lewis, G. P.) 437
Brain, control of glutamate oxidation in mitochondrial systems of (Balázs, R.) 497
Brain cortex, rat, effect of ammonium and other ions on glucose-dependent active transport of L-histidine in slices of (De Almeida, D. F., Chain, E. B. & Pocchiari, F.) 793
Brain, rat, guanine deaminase activity in (Kumur, S., Tewari, K. K. & Krishnan, P. S.) 797
Brain, rat, rate of utilization of glucose and 'compartmentation' of α-oxoglutarate and glutamate in (Gaitonde, M. K.) 803

Caesium ions, effect of, on the action of gramicidin on isolated liver mitochondria (Chappell, J. B. & Crofts, A. R.) 393
Calcium ion, accumulation of, and swelling of isolated liver mitochondria (Chappell, J. B. & Crofts, A. R.) 378
Calcium ion, reversal of swelling induced by, in isolated liver mitochondria with ethylene glycol bis(aminoethyl)-tetra-acetate (Crofts, A. R. & Chappell, J. B.) 387
Calcium ions, effect of, on the glucose-dependent active transport of L-histidine in slices of rat-brain cortex (De Almeida, D. F., Chain, E. B. & Pocchiari, F.) 793
Calcium ions, effect of, on the leakage of protein and enzymes from rat-liver slices (Streffer, C. & Williamson, D. H.) 552
Carbohydrases, hydrolysis of plant hemicellulose fractions and β-linked glucose polymers by, of the rumen ciliate *Epidinium ecaudatum* (Bailey, R. W. & Gaillard, B. D. E.) 758
Carbohydrate, aortic, distribution of in different species (Grant, R. A.) 53P
Carbohydrate, metabolism of, in liver from foetal and neonatal sheep (Ballard, F. J. & Oliver, I. T.) 191
Carbohydrate–polypeptide linkages of α_1-acid glycoprotein (Satake, M., Okuyama, T., Ishihara, K. & Schmid, K.) 749
Carbohydrate units, composition and size of, of α_1-acid glycoprotein (Satake, M., Okuyama, T., Ishihara, K. & Schmid, K.) 749
Carbon dioxide, incorporation of, into milk citrate in the isolated perfused goat udder (Hardwick, D. C.) 233
Carnitine acetyltransferase, kinetic studies on (Chase, J. F. A.) 50P
Catechol, bacterial degradation of (Dagley, S. & Gibson, D. T.) 466
Cell sap, stimulation of the rate of metabolism of propionate by sheep-liver mitochondria by factors from (Smith, R. M., Osborne-White, W. S. & Russell, G. R.) 423
Cell wall, evidence for the linkage between the polysaccharide and mucopeptide components of, of *Lactobacillus casei* (Knox, K. W. & Hall, E. A.) 48P
Cell wall, yeast, features of structure of, revealed by the action of enzymes from a non-fruiting myxobacterium (Bacon, J. S. D., Milne, B. D., Taylor, I. F. & Webley, D. M.) 28C
Cell walls, bacterial, action of hot formamide on (Perkins, H. R.) 876
Cell walls, isolated, rapid extraction of phosphorus during periodate oxidation of, from *Staphylococcus aureus* (Oxford) (Garrett, A. J.) 6C
Cell walls teichoic acid from, of a strain of *Staphylococcus lactis* (Archibald, A. R., Baddiley, J. & Button, D.) 8C
Cellulase activity in soil micro-organisms (Halliwell, G.) 270
Cellulose, catalytic decomposition of, under biological conditions (Halliwell, G.) 35
Cellulose, reprecipitated, hydrolysis of, by cellulolytic enzymes from soil micro-organisms (Halliwell, G.) 270
Ceramide dihexoside in bone marrow (Wajda, M.) 252

Cerebral cortex, movements of radioactive sodium in slices of, in response to electrical stimulation (Keesey, J. C. & Wallgren, H.) 301
Cerebral tissues, maintenance, change on stimulation and subsequent recovery of sodium, potassium and chloride of (Keesey, J. C., Wallgren, H. & McIlwain, H.) 289
Cerebrum, guinea pig, subcellular distribution of phosphoproteins from (Trevor, A. J., Rodnight, R. & Schwartz, A.) 883
Cerebrum, guinea pig, subcellular localization of phosphoproteins sensitive to electrical stimulation of (Trevor, A. J. & Rodnight, R.) 889
Chlorella vulgaris, development of isocitrate lyase in, demonstrated by acrylamide-gel electrophoresis (John, P. C. L. & Syrett, P. J.) 49P
Chloride, maintenance, change on stimulation and subsequent recovery of, of cerebral tissues (Keesey, J. C., Wallgren, H. & McIlwain, H.) 289
Chlorocyclohexenes, enzymic conjugation of some, with glutathione (Sims, P. & Grover, P. L.) 156
Chlorophylls *a* and *b*, electrophoretic separation of derivatives of (Jennings, A. C., Synge, R. L. M. & Watt, W. B.) 49P
Choline sulphatase, control of, in *Aspergillus nidulans*, (Scott, J. & Spencer, B.) 50P
Chondromucoprotein, formation of insoluble complexes between, and sialic acid-deficient glycoproteins (Anderson, A. J.) 9P
Chromaffin granules, adrenal, adenosine-triphosphatase activity of (Banks, P.) 490
Chromaffin granules, adrenal, soluble protein from (Smith, A. D. & Winkler, H.) 42P
Chromatophores, photo-oxidation of succinate by, of *Rhodospirillum rubrum* (Evans, M. C. W.) 661
α-Chymotrypsin, role of methionine in reactions catalysed by (Knowles, J. R.) 180
Cinnabarinic acid, enzymic conversion of 3-hydroxyanthranilic acid into, by the nuclear fraction of rat liver (Subba Rao, P. V., Jegannathan, N. S. & Vaidyanathan, C. S.) 628
Citrate-cleavage enzyme, activities of, in livers of normal and diabetic rats (Kornacker, M. S. & Lowenstein, J. M.) 832
Citrate, milk, incorporation of carbon dioxide into, in the isolated perfused goat udder (Hardwick, D. C.) 233
Cobalt ions, activation of intestinal alkaline β-glycerophosphatase by (Clark, B. & Porteous, J. W.) 475
Collagen, aortic, distribution of, in different species (Grant, R. A.) 53P
Collagen, soluble calf-skin, thermal denaturation of (Tristram, G. R., Worrall, J. & Steer, D. C.) 350
Cortisone, effect of, on concentration and oxidoreduction state of the nicotinamide nucleotides of rat liver (Greenbaum, A. L., Clark, J. B. & McLean, P.) 167
Cortisone 21[^{35}S]-sulphate, sodium, desulphation of, by the rat (Dodgson, K. S., Gatehouse, P. W., Lloyd, A. G. & Powell, G. M.) 18P
Corynebacterium tritici, action of hot formamide on cell walls of (Perkins, H. R.) 876
Cotton, fibrous, hydrolysis of, by cellulolytic enzymes from soil micro-organisms (Halliwell, G.) 270
Creatine phosphokinase during development in skeletal muscle (Kendrick-Jones, J. & Perry, S. V.) 48P
Creatinine, excretion of, in protein-depleted infants (Picou, D., Alleyne, G. A. O., Waterlow, J. C. & Seakins, A.) 18P
Cystamine, effect of, on oxidations by mitochondria (Skrede, S., Bremer, J. & Eldjarn, L.) 838
Cysteamine, effect of, on oxidations by mitochondria (Skrede, S., Bremer, J. & Eldjarn, L.) 838
Cytochrome oxidase, activity of, in the heart and liver of the prenatal and postnatal rat (Lang, C. A.) 365
Dehydroepiandrosterone sulphate, extraction of plasma 3-hydroxy-17-oxo steroid sulphates and the measurement of (McKenna, J. & Rippon, A. E.) 107
Denaturation, thermal, of soluble calf-skin collagen (Tristram, G. R., Worrall, J. & Steer, D. C.) 350
Deoxy- and oxy-haemoglobin, human, a statistical estimation of the values of the haem-linked ionization constants and of the corresponding heats of ionization for (Rossi, L.) 59P
Deoxyribonucleic acid, estimation of, in the presence of sialic acid (Croft, D. N. & Lubran, M.) 612
Deoxyribonucleic acid nucleotidyltransferase, thiol groups in (Keir, H. M. & Shepherd, J. B.) 483
Deoxyribonucleic acid, synthesis of, in polyoma-virus-infected mouse embryo cells (Birnie, G. D. & Fox, S. M.) 41P
Deoxyribonucleic acids, collation of hyperchromicity, optical rotation and viscosity changes with different types of H-water-bridgings in (Lewin, S.) 44P
Deoxyribonucleic acids, glucosylated nucleotide sequences from, of T-even bacteriophage (Lunt, M. R. & Newton, E. A.) 717
Diabetes, activities of citrate-cleavage enzyme and acetate thiokinase in liver of rats with (Kornacker, M. S. & Lowenstein, J. M.) 832
1,4:2,3-Diepoxy-1,2,3,4-tetrahydronaphthalene, metabolism of, in rats (Sims, P.) 608
Diet, influence of, and the administration of thyroid-stimulating hormone on intrathyroidal iodine metabolism in the rat (Barnaby, C. F., Davidson, A. M. & Plaskett, L. G.) 811
7,12-Dimethylbenz[*a*]anthracene, metabolism of, by rat-liver homogenates (Boyland, E. & Sims, P.) 780
Disulphides, effect of, on oxidations by mitochondria (Skrede, S., Bremer, J. & Eldjarn, L.) 838

Elastin, aortic, distribution of in different species (Grant, R. A.) 53P
Electrical stimulation, movements of radioactive sodium in cerebral cortex slices in response to (Keesey, J. C. & Wallgren, H.) 301
Embryo, chick, normal and vitamin B_{12}-deficient, lipid metabolism of (Noble, R. C. & Moore, J. H.) 144
Enzymes, effect of calcium ions on leakage of, from rat-liver slices (Streffer, C. & Williamson, D. H.) 552
Enzymes on solid supports (Lilly, M., Money, C. Hornby, W. & Crook, E. M.) 45P
Epidinium ecaudatum, hydrolysis of plant hemicellulose fractions and β-linked glucose polymers by carbohydrases of (Bailey, R. W. & Gaillard, B. D. E.) 758
1,4-Epoxy-1,4-dihydronaphthalene, metabolism of, in rats (Sims, P.) 608
9,10-Epoxy-9,10-dihydrophenanthrene, metabolism of, in rats (Boyland, E. & Sims, P.) 788
Erythrocyte, survival of, in the newborn infant measured by the administration of [^{15}N]glycine (Vest, M., Strebel, L. & Hauenstein, D.) 11C
Escherichia coli, conversion of pyridoxine phosphate into pyridoxal phosphate in (Henderson, H. M.) 775
Escherichia coli, determination of base ratios of six ribonucleic acid bacteriophages specific to (Bishop, D. H. L. & Bradley, D. E.) 82
Escherichia coli, endogenous metabolism of (Dawes, E. A. & Ribbons, D. W.) 332
Escherichia coli, inhibition of amino acid activation in preparations of, by aflatoxin *in vitro* (Smith, R. H.) 43P
Escherichia coli, mechanism of inhibition by inorganic phosphate of the biosynthesis of alkaline phosphatase with a particulate fraction of (Manson, L. A., Pelmont, J., Yapo, A., Roche, C. & Nisman, B.) 215
Escherichia coli, synthesis of ribosomes by a mutant of (Turnock, G. & Wild, D. G.) 597

Esterase activity of *Pseudomonas aeruginosa* amidase (McFarlane, N. D., Brammar, W. J. & Clarke, P. H.) 24C
Ethyl acetate, hydrolysis and transfer of acyl group of, by *Pseudomonas aeruginosa* amidase (McFarlane, N. D., Brammar, W. J. & Clarke, P. H.) 24C
Ethylene glycol bis(aminoethyl)tetra-acetate, reversal of calcium ion-induced swelling of isolated liver mitochondria with (Crofts, A. R. & Chappell, J. B.) 387

Fat body, insect, intermediary metabolism and (Kilby, B. A.) 37P
Ferritin, separation of haemosiderin and, for studies in the metabolism of iron (Drysdale, J. W. & Ramsay, W. N. M.) 282
Ferritin, small-scale isolation of, for the assay of the incorporation of ^{14}C-labelled amino acids (Drysdale, J. W. & Munro, H. N.) 851
Ferritin, uptake of, and nuclear cytoplasmic relationships in isolated tomato fruit protoplasts (Cocking, E. C.) 28P
Fibrinogen, measurement of synthesis rates of, in rabbits (McFarlane, A. S., Irons, L., Koj, A. & Regoeczi, E.) 536
Fluffy layer, features of mitochondria and, in regenerating rat liver (Gear, A. R. L.) 118
Fluoride, metabolism of, in *Acacia georginae* (Peters, R. A., Murray, L. R. & Shorthouse, M.) 724
Folic acid, inhibition of nicotinamide–adenine dinucleotide-linked 3α-hydroxy steroid dehydrogenase by (Lambe, R. F. & Williams, D. C.) 847
Formamide, hot, action of, on bacterial cell walls (Perkins, H. R.) 876
2-Formamido-1-naphthyl hydrogen sulphate as a metabolite of 2-naphthylamine (Boyland, E. & Manson, D.) 7P
Fraction collector, simple (Doré, C. F., Lister, W. C. & Wright, B. M.) 33P
Fraction cutter, gravimetric (Wright, B. M.) 32P
Fructose 1,6-diphosphatase, rat-liver, properties of, and the control of gluconeogenesis (Underwood, A. H. & Newsholme, E. A.) 767
Fumigatin (3-hydroxy-4-methoxytoluquinone), incorporation of 6-methylsalicylic acid into, in *Aspergillus fumigatus* (Packter, N. M. & Steward, M. W.) 4P

Galactarate, metabolism of, by species of *Pseudomonas* (Dagley, S. & Trudgill, P. W.) 48
Gastric juice, normal, dialysable peptide in (Heathcote, J. G. & Washington, R. J.) 24P
Gastric washings, human, estimation of deoxyribonucleic acid in the presence of sialic acid in (Croft, D. N. & Lubran, M.) 612
Gentisic acid, formation of, from 2-naphthol by a *Pseudomonas* (Walker, N. & Lippert, K. D.) 5C
Germination, changes in the free nucleotide and nucleoside pattern of pea seeds in relation to (Brown, E. G.) 509
Gliocladium roseum, biosynthesis of gliorosein in (Steward, M. W. & Packter, N. M.) 26C
Gliorosein, biosynthesis of, in *Gliocladium roseum* (Steward, M. W. & Packter, N. M.) 26C
γ-Globulin, a hypothesis on the catabolism of (Rogers-Brambell, F. W.) 14P
γ-Globulin (IgM), 19S, normal human, preparation and properties of the peptide chains of (Chaplin, H., Cohen, S. & Press, E. M.) 256
Globulins, autoimmune, in connective tissue disease (Holborow, E. J.) 16P
Globulins, γ_{1A} immune, glycopeptides of (Clamp, J. R. & Putnam, F. W.) 22P
Globulins, γ_2 immune, glycopeptides of (Clamp, J. R., Dawson, G. & Putnam, F. W.) 22P
γ-Globulins, peptide liberation in degradation of (Robert, B., Bockman, R. & Crepin, Y.) 21P
Glucagon, effect of, on concentration and oxidoreduction state of the nicotinamide nucleotides of rat liver (Greenbaum, A. L., Clark, J. B. & McLean, P.) 167
D-Glucarate, metabolism of, by species of *Pseudomonas* (Dagley, S. & Trudgill, P. W.) 48
Gluconeogenesis, properties of fructose 1,6-diphosphatase of rat liver and the control of (Underwood, A. H. & Newsholme, E. Z.) 767
Gluconeogenesis, properties of phosphofructokinase from rat liver and the control of glycolysis and (Underwood, A. B. & Newsholme, E. A.) 868
Glucose, formation and fate of acetyl groups from, in the isolated perfused goat udder (Hardwick, D. C.) 46P
Glucose, hydrolysis of β-linked polymers of, by carbohydrases of the rumen ciliate *Epidinium ecaudatum* (Bailey, R. W. & Gaillard, B. D. E.) 758
Glucose, rate of utilization of, and 'compartmentation' of α-oxoglutarate and glutamate in rat brain (Gaitonde, M. K.) 803
Glucuronic acid, effect of starvation on the enzymes for synthesis of ascorbic acid and xylulose from (Stirpe, F. & Comporti, M.) 354
Glucuronides, effect of thiol reagents in synthesis of (Storey, I. D. E.) 201
Glucuronolactone, effect of starvation in various animals on the synthesis of xylulose from (Stirpe, F., Comporti, M. & Della Corte, E.) 363
Glutamate and propionate, interrelations of, in aged mitochondria of sheep liver (Smith, R. M., Osborne-White, W. S. & Russell, G. R.) 431
Glutamate, 'compartmentation' of α-oxoglutarate, and rate of utilization of glucose in rat brain (Gaitonde, M. K. 803
Glutamate, control of oxidation of, in brain and liver mitochondrial systems (Balázs, R.) 497
Glutamate, oxidation of, by rat-liver mitochondria (Quagliariello, E., Papa, S., Saccone, C., Palmieri, F. & Francavilla, A.) 742
Glutamine, interaction of aspartate aminotransferase with (Scotto, P. & Scardi, V.) 657
Glutathione, enzymic conjugation of some chlorocyclohexenes with (Sims, P. & Grover, P. L.) 156
β-Glycerophosphatase, alkaline, metal ion activation of, of rabbit small intestine (Clark, B. & Porteous, J. W.) 475
[^{15}N]Glycine, extent of 'shunt' bilirubin and erythrocyte survival in the newborn infant measured by the administration of (Vest, M., Strebel, L. & Hauenstein, D.) 11C
Glycogen, intracellular changes in, after starvation of *Escherichia coli* (Dawes, E. A. & Ribbons, D. W.) 332
Glycogen, synthesis of, from pyruvate in muscle (Mahler, R.) 47P
Glycolipids, occurrence of, in Gram-positive bacteria (Brundish, D. E., Shaw, N. & Baddiley, J.) 21C
Glycollate, utilization of, by the β-hydroxyaspartate pathway in *Micrococcus denitrificans* (Kornberg, H. L. & Morris, J. G.) 577
Glycolysis, irreversible nature of, in the housefly (*Musca domestica*) (Heslop, J. P.) 40P
Glycolysis, properties of phosphofructokinase from rat liver and the control of gluconeogenesis and (Underwood, A. H. & Newsholme, E. A.) 868
Glycopeptides of γ_{1A} immune globulins (Clamp, J. R. & Putnam, F. W.) 22P
Glycopeptides of γ_2 immune globulins (Clamp, J. R., Dawson, G. & Putnam, F. W.) 22P
Glycoprotein, α_1-acid, carbohydrate–polypeptide linkages, amino acid sequences of peptides adjacent to some of these bonds and the composition and size of the carbohydrate units of (Satake, M., Okuyama, T., Ishihara, K. & Schmid, K.) 749
Glycoprotein, isolation and characterization of, from the seeds of kidney beans (Pusztai, A.) 3C

Glycoproteins, sialic acid-deficient, formation of insoluble complexes between, and chondromucoprotein (Anderson, A. J.) 9P
Glycosaminopeptides, extraction of teichoic acids from bacterial walls with phenylhydrazine and its significance for the nature of their linkage with (Archibald, A. R. & Baddiley, J.) 19C
Gramicidin and ion transport in isolated liver mitochondria (Chappell, J. B. & Crofts, A. R.) 393
Growth hormone, effect of, on concentration and oxido-reduction state of the nicotinamide nucleotides of rat liver (Greenbaum, A. L., Clark, J. B. & McLean, P.) 167
Guaiacyl artificial lignin, properties of (Bland, D. E. & Logan, A. F.) 515
Guanine deaminase, activity of, in rat brain and liver (Kumar, S., Tewari, K. K. & Krishnan, P. S.) 797
Gulonate, effect of starvation in various animals on the synthesis of xylulose from (Stirpe, F., Comporti, M. & Della Corte, E.) 363

Haem-linked effects, role of the metal in (Hanania, G. I. H.) 60P
Haemoglobin, aggregation of subunits and the oxygen equilibrium of (Briehl, R. L. W.) 58P
Haemoglobin and messenger ribonucleic acid biosynthesis (Arnstein, H. R. V., Cox, R. A. & Gould, H.) 62P
Haemoglobin, comparison of erythropoiesis and synthesis of, with development and early differentiation in the sea urchin (Borsook, H.) 60P
Haemoglobin, conformational changes in, as measured by anti-haemoglobin (Levine, L. & Reichlin, M.) 57P
Haemoglobin, effect of carbon dioxide on affinity of, for oxygen (Longmuir, I. S. & Colman, C. H.) 16P
Haemoglobin, equilibria and kinetics of the reactions of, with ligands (Antonini, E.) 59P
Haemoglobin, mammalian, physicochemical studies of the oxygen equilibrium of (Roughton, F. J. W.) 58P
Haemoglobin, Mossbauer effects in compounds of (Lang, G. & Marshall, W.) 56P
Haemoglobin, ribosome function in reticulocyte synthesis of (Marks, P. A., Rifkind, R. A., Conconi, F. & Perl, W.) 62P
Haemoglobin, role of soluble factors in directing the specificity of biosynthesis of, in cell-free systems (Dreyfus, J. C., Schapira, G., Kruh, J., Padieu, P. & Maleknia, N.) 62P
Haemoglobin, sites of contact between haemoglobin chains studied in dissociation of (Tanford, C.) 56P
Haemoglobin, structure and function of (Perutz, M. F.) 55P
Haemoglobin F_1, studies with (Huehns, E. R. & Shooter, E. M.) 57P
Haemoglobin, subunit interaction and ligand binding in (Benesch, R. & Benesch, R. E.) 60P
Haemoglobin, use of amino acid analogues and antiobitics in the study of the synthesis of (Baglioni, C., Colombo, B. & Felicetti, L.) 61P
Haemosiderin, separation of ferritin and, for studies in the metabolism of iron (Drysdale, J. W. & Ramsay, W. N. M.) 282
Heart, rat, perfused, isolated, evidence for extracellular enzymic activity of the (Williamson, J. R. & DiPietro, D. L.) 226
Heart, respiratory enzymes in, of the prenatal and post-natal rat (Lang, C. A.) 365
Helianthus tuberosus, *see* Jerusalem artichoke
Hemicellulose, plant, hydrolysis of fractions of, by carbohydrases of the rumen ciliate *Epidinium ecaudatum* (Bailey, R. W. & Gaillard, B. D. E.) 758
trans-Δ^3-Hexadecenoic acid, distribution of, in plants and photosynthetic micro-organisms (Nichols, B. W., Wood, B. J. B. & James, A. T.) 6P
Hexaric acids, metabolism of, by species of *Pseudomonas* (Dagley, S. & Trudgill, P. W.) 48
Hexose, photoassimilation of succinate to, by *Rhodospirillum rubrum* (Evans, M. C. W.) 669
L-Histidine, effect of ammonium and other ions on the glucose-dependent active transport of, in slices of rat-brain cortex (De Almeida, D. F., Chain, E. B. & Pocchiari, F.) 793
Histidine, reactions of residues containing, in sperm-whale metmyoglobin (Gurd, F. R. N.) 60P
Housefly (*Musca domestica*), incorporation of *N*-methylaminoethanol and *N*-dimethylaminoethanol into the phospholipids of (Bridges, R. G. & Ricketts, J.) 41P
Housefly (*Musca domestica*), irreversible nature of glycolysis in (Heslop, J. P.) 40P
3α-Hydroxy steroid dehydrogenase, nicotinamide–adenine dinucleotide-linked, inhibition of, by antimetabolic drugs (Lambe, R. F. & Williams, D. C.) 847
3-Hydroxyanthranilic acid, enzymic conversion of, into cinnabarinic acid by the nuclear fraction of rat liver (Subba Rao, P. V., Jegannathan, N. S. & Vaidyanathan, C. S.) 628
β-Hydroxyaspartate pathway, utilization of glycollate in *Micrococcus denitrificans* by (Kornberg, H. L. & Morris, J. G.) 577
2-Hydroxy-4-methylthiobutyric acid, biochemical conversion of, into methionine by the rat *in vitro* (Langer, B. W., jun.) 683
3-Hydroxy-17-oxo steroid sulphates, plasma, extraction of, and the measurement of the constituent dehydroepiandrosterone sulphate and androsterone sulphate (McKenna, J. & Rippon, A. E.) 107
p-Hydroxyphenyl artificial lignin, properties of (Bland, D. E. & Logan, A. F.) 515
Hydroxyproline, excretion, of in protein-depleted infants (Picou, D., Alleyne, G. A. O., Waterlow, J. C. & Seakins, A.) 18P

Immune deviation (Asherson, G. L.) 14P
Immunoglobulin, human, normal, separation of the κ and λ chains of (Cohen, S.) 13P
Immunoglobulins IgD, a new class of, of normal human serum (Rowe, D. S.) 13P
Immunoglobulins in the antibody-deficiency syndrome (Soothill, J. F.) 15P
Insects, active transport in (Treherne, J. E.) 35P
Insects, distinctive features of, metabolism of (Wintering-ham, F. P. W.) 36P
Insects, formation of specific structural and enzymic pattern of flight muscle from (Bücher, T.) 36P
Insects, intermediary metabolism and fat body of (Kilby, B. A.) 37P
Insects, metabolism of aromatic compounds by (Brunet, P. C. J.) 38P
Insects, skeletal structure in (Rudall, K. M.) 38P
Insulin, effect of, on citrate-cleavage enzyme and acetate thiokinase in livers of normal and diabetic rats (Kornacker, M. S. & Lowenstein, J. M.) 832
Insulin, equilibrium-dialysis study of binding of zinc to (Summerell, J. M., Osmand, A. & Smith, G. H.) 31P
Interferon, calf, properties of (Davies, A.) 20P
Intestine, small rabbit, metal ion activation of the alkaline β-glycerophosphatase of (Clark, B. & Porteous, J. W.) 475
Inulin, physical properties of solutions of (Phelps, C. F.) 41
Invertase, development of, in mature storage tissue of the Jerusalem artichoke (Edelman, J. & Hall, M. A.) 403
Iodine, influence of diet and the administration of thyroid-stimulating hormone on intrathyroidal metabolism of, in the rat (Barnaby, C. F., Davidson, A. M. & Plaskett, L. G.) 811

Iodomethane, metabolism of (Barnsley, E. A. & Young, L.) 77
Ion transport and gramicidin in isolated liver mitochondria (Chappell, J. B. & Crofts, A. R.) 393
Ionox 330 [2,4,6-tri-(3′,5′-di-*tert.*-butyl-4′-hydroxybenzyl)-mesitylene], fate of, in the dog and rat (Wright, A. S., Crowne, R. S. & Hathway, D. E). 98
Iron, separation of ferritin and haemosiderin for studies in the metabolism of (Drysdale, J. W. & Ramsay, W. N. M.) 282
Isocitrate lyase, development of, in *Chlorella vulgaris* demonstrated by acrylamide-gel electrophoresis (John, P. C. L. & Syrett, P. J.) 49P
Isoniazid, reaction of periodate-oxidized ribonucleosides, 5′-ribonucleotides and ribonucleic acid with (Hunt, J. A.) 541
Isoprenoid synthesis and vitamin A in the rat (Diplock, A. T., Green, J. & Bunyan, J.) 138

Jerusalem artichoke (*Helianthus tuberosus*), development of invertase and ascorbate-oxidase activities in mature storage tissue of (Edelman, J. & Hall, M. A.) 403

Kephalin, requirement for, by L-malate oxidase of *Pseudomonas ovalis* Chester (Francis, M. J. O. & Phizackerley, P. J. R.) 25P
Keratin, whalebone, chemical composition of fractions of (Fincham, A. G. & Graham, G. N.) 6P
Kidney beans, isolation and characterization of a glycoprotein from the seeds of (Pusztai, A.) 3C
Kidney, rat, isolation and properties of lysosomes of (Shibko, S. & Tappel, A. L.) 731
Kojic acid, possible role of, in the production of aflatoxin by *Aspergillus flavus* (Heathcote, J. G., Child, J. J. & Dutton, M. F.) 23P

Lactobacillus casei, evidence for the linkage between the polysaccharide and mucopeptide components of the cell wall of (Knox, K. W. & Hall, E. A.) 48P
L-Leucyl-β-naphthylamide, spectrofluorimetric estimation and properties of enzymes in human tissues which hydrolyse (Panveliwalla, D. K. & Moss, D. W.) 31P
Leydig cell tumour, feminizing, formation of neutral steroid sulphates by, from a human subject (Pierrepoint, C. G., Griffiths, K., Grant, J. K. & Stewart, J. S. S.) 55P
Ligand equilibrium curves, symmetry and invariance in (Wyman, J.) 59P
Lignins, artificial, syringyl, guaiacyl and *p*-hydroxyphenyl, properties of (Bland, D. E. & Logan, A. F.) 515
Lipid, composition of, in human bone marrow (Wajda, M.) 252
Lipid, metabolism of, in the normal and vitamin B_{12}-deficient chick embryo (Noble, R. C. & Moore, J. H.) 144
Lipid, mitochondrial, dietary alterations of pattern of (Sheltawy, A.) 561
Lipids, rat tissue, effect of hypervitaminosis A on (Misra, U. K.) 30P
Lithium ions, effect of, on the action of gramicidin on isolated liver mitochondria (Chappell, J. B. & Crofts, A. R.) 393
Liver, activities of citrate-cleavage enzyme and acetate thiokinase in, of normal and diabetic rats (Kornacker, M. S. & Lowenstein, J. M.) 832
Liver, activity of alcohol dehydrogenase of, with nicotinamide–adenine dinucleotide phosphate as coenzyme (Dalziel, K. & Dickinson, F. M.) 311
Liver, carbohydrate metabolism in, from foetal and neonatal sheep (Ballard, F. J. & Oliver, I. T.) 191
Liver, control of glutamate oxidation in mitochondrial systems of (Balázs, R.) 497
Liver mitochondria, isolated, calcium ion accumulation and swelling of (Chappell, J. B. & Crofts, A. R.) 378
Liver mitochondria, isolated, gramicidin and ion transport in (Chappell, J. B. & Crofts, A. R.) 393
Liver mitochondria, isolated, reversal of calcium ion-(induced) swelling of, with ethylene glycol bis(amino-ethyl)tetra-acetate (Crofts, A. R. & Chappell, J. B.) 387
Liver, mouse, differences in the conjugation of *o*-aminophenol and *p*-nitrophenol by the uridine diphosphate-transglucuronylase in homogenates of (Storey, I. D. E.) 209
Liver, mouse, inhibition of the uridine diphosphate-transglucuronylase in homogenates of, by thiol reagents (Storey, I. D. E.) 201
Liver, nuclear protein in, in protein–calorie deficiency (Hryniewiecki, L.) 238
Liver, rat, effect of different hormonal conditions on the concentration and oxidoreduction state of the nicotinamide nucleotides of (Greenbaum, A. L., Clark, J. B. & McLean, P.) 167
Liver, rat, effects of adenine nucleotides on pyruvate metabolism in (Berry, M. N.) 587
Liver, rat, enzymic conversion of 3-hydroxyanthranilic acid into cinnabarinic acid by the nuclear fraction of (Subba Rao, P. V., Jegannathan, N. S. & Vaidyanathan, C. S.) 628
Liver, rat, guanine deaminase activity in (Kumar, S., Tewari, K. K. & Krishnan, P. S.) 797
Liver, rat, isolated, perfused, excretion of biliary bile acids in (Percy-Robb, I. W. & Boyd, G. S.) 54P
Lysosomes, rat-kidney, isolation and properties of (Shibko, S. & Tappel, A. L.) 731
Liver, rat, metabolic and chemical properties of basic proteins isolated from nuclei of (Ord, M. G., Raaf, J. H., Smit, J. A. & Stocken, L. A.) 321
Liver, rat, metabolism of 7,12-dimethylbenz[*a*]anthracene by homogenates of (Boyland, E. & Sims, P.) 780
Liver, rat, oxidation of glutamate by mitochondria of (Quagliariello, E., Papa, S., Saccone, C., Palmieri, F. & Francavilla, A.) 742
Liver, rat, production of amino acids by mitochondria and other subcellular fractions of (Alberti, K. G. M. M. & Bartley, W.) 641
Liver, rat, properties of fructose 1,6-diphosphatase of, and the control of gluconeogenesis (Underwood, A. H. & Newsholme, E. A.) 767
Liver, rat, properties of phosphofructokinase from, and the control of glycolysis and gluconeogenesis (Underwood, A. H. & Newsholme, E. A.) 868
Liver, rat, regenerating, features of mitochondria and fluffy layer in (Gear, A. R. L.) 118
Liver, rat, stabilizing effect of the supernatant fraction on the structure of polyribosomes from (Bont, W. S., Rezelman, G. & Bloemendal, H.) 15C
Liver, respiratory enzymes in, of the prenatal and postnatal rat (Lang, C. A.) 365
Liver, sheep, interrelations of propionate and glutamate in aged mitochondria of (Smith, R. M., Osborne-White, W. S. & Russell, G. R.) 431
Liver, sheep, oxidation of propionate by homogenates of (Smith, R. M. & Osborne-White, W. S.) 411
Liver, sheep, stimulation of the rate of metabolism of propionate by mitochondria from, by factors from the cell sap (Smith, R. M., Osborne-White, W. S. & Russell, G. R.) 423
Liver slices, rat, effect of calcium ions on the leakage of protein and enzymes from (Streffer, C. & Williamson, D. H.) 552
Liver, synthesis of ribonucleic acid by suspended cells of (Jacob, S. T. & Bhargava, P. M.) 568

Magnesium ions, activation of intestinal alkaline β-glycerophosphatase by (Clark, B. & Porteous, J. W.) 475
L-Malate oxidase, kephalin requirement for, of *Pseudomonas ovalis* Chester (Francis, M. J. O. & Phizackerley, P. J. R.) 25P
α-Maltosyl residues, (1→6)-linked, enzymic transfer of, by an enzyme preparation from sweet corn (Taylor, P. M. & Whelan, W. J.) 26P
Mammary gland, goat, lactating, amino acid uptake by (Mepham, T. B. & Linzell, J. L.) 47P
Manganese, effect of, on calcification of bone (Tal, E. & Guggenheim, K.) 94
2-Mercaptoethanol, action of, on yeast cell wall (Bacon, J. S. D., Milne, B. D., Taylor, I. F. & Webley, D. M.) 28C
Metal ion, activation of the alkaline β-glycerophosphatase of rabbit small intestine by (Clark, B. & Porteous, J. W.) 475
Methane, synthesis of cell constituents by *Pseudomonas methanica* grown on (Johnson, P. A. & Quayle, J. R.) 859
Methanol, synthesis of cell constituents by *Pseudomonas methanica* grown on (Johnson, P. A. & Quayle, J. R.) 859
Methionine, biochemical conversion of 2-hydroxy-4-methylthiobutyric acid into, by the rat *in vitro* (Langer, B. W., jun.) 683
Methionine, role of, in reactions catalysed by α-chymotrypsin (Knowles, J. R.) 180
Methionine, synthesis of ribosomes by *Escherichia coli* requiring (Turnock, G. & Wild, D. G.) 597
Methionyl-lysyl-bradykinin from ox blood (Elliott, D. F. & Lewis, G. P.) 437
N-Methylaminoethanol, incorporation of *N*-dimethylaminoethanol and, into the phospholipids of the housefly (*Musca domestica*) (Bridges, R. G. & Ricketts, J.) 41P
Methylazoxymethyl acetate, synthesis of (Matsumoto, H., Nagahama, T. & Larson, H. O.) 13C
Methylcyclohexane, metabolism of (Elliott, T. H., Tao, R. C. C. & Williams, R. T.) 70
Methylcyclohexanols and methylcyclohexanones, isomeric, stereochemical aspects of the metabolism of (Elliott, T. H., Tao, R. C. C. & Williams, R. T.) 59
Methylcyclohexanones and methylcyclohexanols, isomeric, stereochemical aspects of the metabolism of (Elliott, T. H., Tao, R. C. C. & Williams, R. T.) 59
S-Methylcysteine, urinary excretion of, after administration of iodomethane to rats (Barnsley, E. A. & Young, L.) 77
Methylmercapturic acid, urinary excretion of, after administration of iodomethane to rats (Barnsley, E. A. & Young, L.) 77
6-Methylsalicylic acid, incorporation of, into fumigatin (3-hydroxy-4-methoxytoluquinone) in *Aspergillus fumigatus* (Packter, N. M. & Steward, M. W.) 4P
Methylthioacetic acid, urinary excretion of, after administration of iodomethane to rats (Barnsley, E. A. & Young, L.) 77
N-(Methylthioacetyl)glycine, urinary excretion of, after administration of iodomethane to rats (Barnsley, E. A. & Young, L.) 77
Metmyoglobin and apomyoglobin, conformational changes in, due to combination with antibody (Crumpton, M. J.) 21P
Metmyoglobin, sperm-whale, reactions of histidine residues in (Gurd, F. R. N.) 60P
Micrococcus denitrificans, utilization of glycollate in, by the β-hydroxyaspartate pathway (Kornberg, H. L. & Morris, J. G.) 577
Micrococcus lysodeikticus, action of hot formamide on cell walls of (Perkins, H. R.) 876
Milk, incorporation of carbon dioxide into citrate of, in the isolated perfused goat udder (Hardwick, D. C.) 233
Mitochondria, effect of atractylate and oligomycin on the behaviour of, towards adenine nucleotides (Chappell, J. B. & Crofts, A. R.) 707
Mitochondria, effect of disulphides on oxidations by (Skrede, S., Bremer, J. & Eldjarn, L.) 838
Mitochondria, features of fluffy layer and, in regenerating rat liver (Gear, A. R. L.) 118
Mitochondria, liver, changes in lipid composition of, in rats given normal, fat and fat–cholesterol diets (Sheltawy, A.) 561
Mitochondria, liver, isolated, calcium ion accumulation and swelling of (Chappell, J. B. & Crofts, A. R.) 378
Mitochondria, liver, isolated, gramicidin and ion transport in (Chappell, J. B. & Crofts, A. R.) 393
Mitochondria, liver, isolated, reversal of calcium ion-(induced) swelling of, with ethylene glycol bis(aminoethyl)-tetra-acetate (Crofts, A. R. & Chappell, J. B.) 387
Mitochondria, rat-liver, oxidation of glutamate by (Quagliariello, E., Papa, S., Saccone, C., Palmieri, F. & Francavilla, A.) 742
Mitochondria, rat-liver, production of amino acids by (Alberti, K. G. M. M. & Bartley, W.) 641
Mitochondria, sheep-liver, aged, interrelations of propionate and glutamate in (Smith, R. M., Osborne-White, W. S. & Russell, G. R.) 431
Mitochondria, sheep liver, stimulation of the rate of metabolism of propionate by, by factors from the cell sap (Smith, R. M., Osborne-White, W. S. & Russell, G. R.) 423
5,6-Monoepoxyvitamin A, aldehyde metabolism and biological potency of, in the rat (Lakshmanan, M. R., Jungalwala, F. B. & Cama, H. R.) 27
5,6-Monoepoxyvitamin A, preparation and properties of acetate, alcohol and aldehyde of (Jungalwala, F. B. & Cama, H. R.) 17
Mosquito (*Aedes aegypti*), protein and nucleic acid changes during growth and aging in (Lang, C. A., Lau, H. Y. & Jefferson, D. J.) 372
Muscle, flight, insect, formation of specific structural and enzymic pattern of (Bücher, T.) 36P
Muscle, skeletal, 5′-adenylic deaminase and creatine phosphokinase during development in (Kendrick-Jones. J. & Perry, S. V.) 48P
Muscle, synthesis of glycogen from pyruvate in (Mahler, R.) 47P
Mustard seeds, survey of the polysaccharide components of, with special reference to the embryos (Hirst, E. L., Rees, D. A. & Richardson, N. G.) 453
Myoglobin, equilibria and kinetics of the reactions of, with ligands (Antonini, E.) 59P
Myxinol, chemical nature of (Cross, A. D. & Haslewood, G. A. D.) 53P
Myxobacterium, non-fruiting, features of the cell wall structure of yeast revealed by action of enzymes from (Bacon, J. S. D., Milne, B. D., Taylor, I. F. & Webley, D. M.) 28C

Naphthalene, metabolism of, in rats (Sims, P.) 608
2-Naphthol, formation of gentisic acid from, by a *Pseudomonas* (Walker, N. & Lippert, K. D.) 5C
Nicotinamide–adenine dinucleotide–cytochrome *c* reductase, activity of, in the heart and liver of the prenatal and postnatal rat (Lang, C. A.) 365
Nicotinamide–adenine dinucleotide-linked 3α-hydroxy steroid dehydrogenase, inhibition of, by antimetabolic drugs (Lambe, R. F. & Williams, D. C.) 847
Nicotinamide–adenine dinucleotide phosphate, activity of liver alcohol dehydrogenase with, as coenzyme (Dalziel, K. & Dickinson, F. M.) 311
Nicotinamide nucleotide transhydrogenation, kinetics of, by human placenta (Hagerman, D. D. & Villee, C. A.) 150

Nicotinamide nucleotides, estimation of the oxidized and reduced forms of (Greenbaum, A. L., Clark, J. B. & McLean, P.) 161
Nicotinamide nucleotides, rat liver, effect of different hormonal conditions on the concentration and oxido-reduction state of (Greenbaum, A. L., Clark, J. B. & McLean, P.) 167
p-Nitrophenol and *o*-aminophenol, differences in the conjugation of, by the uridine diphosphate transglucuronylase of mouse-liver homogenates (Storey, I. D. E.) 209
Nitrosomonas, oxidation of ammonia by (Anderson, J. H.) 688
Nuclei, isolated, rat-liver, characterization of the product of the ribonucleic acid polymerase of (Widnell, C. C.) 42P
Nuclei, rat liver and thymus gland, metabolic and chemical properties of basic proteins isolated from (Ord, M. G., Raaf, J. H., Smit, J. A. & Stocken, L. A.) 321
Nucleic acid, changes in, during growth and aging in the mosquito (Lang, C. A., Lau, H. Y. & Jefferson, D. J.) 372
Nucleic acid, effect of pyridoxine deficiency on metabolism of, in the rat (Trakatellis, A. C. & Axelrod, A. E.) 344
Nucleic acid, metabolism of amino acid and, in the larva of the blowfly (*Calliphora erythrocephala*) (Price, G. M.) 39P
Nucleoside, free, changes in, during germination of pea seeds (Brown, E. G.) 509
Nucleotide, free, changes in, during germination of pea seeds (Brown, E. G.) 509
Nucleotide sequences, glucosylated, from T-even bacteriophage deoxyribonucleic acids (Lunt, M. R. & Newton, E. A.) 717

Oestrone, urinary, observation of human male cycles of (Exley, D. & Corker, C. S.) 54P
Oligomycin, effect of atractylate and, on the behaviour of mitochondria towards adenine nucleotides (Chappell, J. B. & Crofts, A. R.) 707
Oligosaccharides, anomalous reduction of alkaline 3,5-dinitrosalicylate by, and its bearing on amylase studies (Robyt, J. F. & Whelan, W. J.) 10P
Ornithine carbamoyltransferase, effect of biotin homologues on synthesis of, in yeast (Dixon, B. & Rose, A. H.) 25P
Orosomucoid, polymerized, viral inhibition by (Whitehead, P. H.) 8P
5-Oxodecanoic acid, reduction of, by normal baker's yeast (Francke, A.) 633
α-Oxoglutarate, 'compartmentation' of glutamate and, and rate of utilization of glucose in rat brain (Gaitonde, M. K.) 803
Oxy- and deoxy-haemoglobin, human, a statistical estimation of the values of the haem-linked ionization constants and of the corresponding heats of ionization for (Rossi, L.) 59P
Oxyhaemoglobin, human, sedimentation studies of, in neutral and slightly acid solution (Gilbert, G. A.) 56P
17-Oxo steroids, urinary, observation of human male cycles of (Exley, D. & Corker, C. S.) 54P

Pasteur effect in Novikoff ascites-hepatoma cells (Nigam, V. N.) 1C
Pea seeds, changes in the free nucleotide and nucleoside pattern of, during germination (Brown, E. G.) 509
Pentoses, metabolism of, by species of *Pseudomonas* (Dagley, S. & Trudgill, P. W.) 48
Peptide bond, mechanism of the synthesis of (Schweet, R.) 61P
Peptide chains, preparation and properties of, of normal human 19s γ-globulin (IgM) (Chaplin, H., Cohen, S. & Press, E. M.) 256
Peptide, dialysable, in normal gastric juice (Heathcote, J. G. & Washington, R. J.) 24P
Peptide, liberation of, in degradation of γ-globulins (Robert, B., Bockman, R. & Crepin, Y.) 21P
Peptides, amino acid sequences of, adjacent to carbohydrate–polypeptide linkages of α_1-acid glycoprotein (Satake, M., Okuyama, T., Ishihata, K. & Schmid, K.) 749
Peptides, estimation of molecular size of, by gel filtration (Carnegie, P. R.) 9P
Perhydroxylase, cell-free system, from soil *Pseudomonas* containing, with activity on aromatic hydrocarbons (Griffiths, E. & Evans, W. C.) 51P
Periodic fever, urinary dehydroepiandrosterone sulphate in (McKenna, J. & Rippon, A. E.) 107
Phenanthrene, ring-fission mechanism for oxidative metabolism of anthracene and, by soil pseudomonads (Evans, W. C., Fernley, H. N. & Griffiths, E.) 819
Phenylhydrazine, extraction of teichoic acids from bacterial walls with, and its significance for the nature of their linkage with glycosaminopeptides (Archibald, A. R. & Baddiley, J.) 19C
Phosphatase, alkaline, mechanism of inhibition by inorganic phosphate of the biosynthesis of, with a particulate fraction of *Escherichia coli* (Manson, L. A., Pelmont, J., Yapo, A., Roche, C. & Nisman, B.) 215
Phosphate, inorganic, mechanism of inhibition of the biosynthesis of alkaline phosphatase with a particulate fraction of *Escherichia coli* by (Manson, L. A., Pelmont, J., Yapo, A., Roche, C. & Nisman, B.) 215
[^{32}P]Phosphatidylmonomethylaminoethanol, methylation of, by *S*-adenosyl-L-[*Me*-^{14}C]methionine in liver preparations (Marshall, E. F., Chojnacki, T. & Ansell, G. B.) 30P
Phosphofructokinase, rat-liver, properties of, and the control of glycolysis and gluconeogenesis (Underwood, A. H. & Newsholme, E. A.) 868
Phosphogluconate dehydrogenase, human red cell, stability differences of inherited variants of (Parr, C. W. & Parr, I. B.) 16P
Phosphohexose isomerase, evidence for extracellular activity of, in the isolated perfused rat heart (Williamson, J. R. & DiPietro, D. L.) 226
Phospholipid, analysis of, by mild hydrolysis (Wajda, M.) 252
Phosphoproteins, cerebral, subcellular distribution of (Trevor, A. J., Rodnight, R. & Schwartz, A.) 883
Phosphoproteins, cerebral, subcellular localization of, sensitive to electrical stimulation (Trevor, A. J. & Rodnight, R.) 889
Phosphorus, rapid extraction of, during periodate oxidation of isolated cell walls of *Staphylococcus aureus* (Oxford) (Garrett, A. J.) 6C
Photoassimilation of succinate to hexose by *Rhodospirillum rubrum* (Evans, M. C. W.) 669
Photo-oxidation of succinate by chromatophores of *Rhodospirillum rubrum* (Evans, M. C. W.) 661
Placenta, human, kinetics of nicotinamide nucleotide transhydrogenation by (Hagerman, D. D. & Villee, C. A.) 150
Polyoma virus, deoxyribonucleic acid synthesis in mouse embryo cells infected with (Birnie, G. D. & Fox, S. M.) 41P
Polyphenolic compounds, action of, on enzymes (Sanderson, G. W.) 24P
Polyribosomes, stabilizing effect of the supernatant fraction on the structure of, from rat liver (Bont, W. S., Rezelman, G. & Bloemendal, H.) 15C
Polysaccharide, evidence for the linkage between, and mucopeptide components of the cell wall of *Lactobacillus casei* (Knox, K. W. & Hall, E. A.) 48P
Polysaccharides, survey of components of mustard seeds containing, with special reference to the embryos (Hirst, E. L., Rees, D. A. & Richardson, N. G.) 453
Potassium ions, effect of, on the glucose-dependent active transport of L-histidine in slices of rat-brain cortex (De Almeida, D. F., Chain, E. B. & Pocchiari, F.) 793

Potassium, maintenance, change on stimulation and subsequent recovery of, of cerebral tissues (Keesey, J. C., Wallgren, H. & McIlwain, H.) 289
Progesterone, method for the estimation of 6-oxygenated metabolites of, in urine (James, F. & Fotherby, K.) 459
Propionate, interrelations of, and glutamate in aged mitochondria of sheep liver (Smith, R. M., Osborne-White, W. S. & Russell, G. R.) 431
Propionate, oxidation of, by homogenates of sheep liver (Smith, R. M. & Osborne-White, W. S.) 411
Propionate, stimulation of the rate of metabolism of, by sheep-liver mitochondria by factors from the cell sap (Smith, R. M., Osborne-White, W. S. & Russell, G. R.) 423
Propionic acid, effect of vitamin B_{12} deficiency on excretion of, by the human (White, A. M.) 17P
Protein–calorie deficiency, nuclear protein in the liver in (Hyrniewiecki, L.) 238
Protein, changes in, during growth and aging in the mosquito (Lang, C. A., Lau, H. Y. & Jefferson, D. J.) 372
Protein, effect of calcium ions on leakage of, from rat-liver slices (Streffer, C. & Williamson, D. H.) 552
Protein, nuclear, in the liver in protein–calorie deficiency (Hyrniewiecki, L.) 238
Protein, soluble, from adrenal chromaffin granules (Smith, A. D. & Winkler, H.) 42P
Proteins, basic, metabolic and chemical properties of, isolated from nuclei of rat liver and thymus gland (Ord, M. G., Raaf, J. H., Smit, J. A. & Stocken, L. A.) 321
Proteins, respiratory, comparative study of the primary structure of (Rudloff, V., Hilse, K., Nakajima, H. & Braunitzer, G.) 57P
Pseudomonas aeruginosa, esterase activity of amidase from (McFarlane, N. D., Brammar, W. J. & Clarke, P. H.) 24C
Pseudomonas, formation of gentisic acid from 2-naphthol by (Walker, N. & Lippert, K. D.) 5C
Pseudomonas, metabolism of galactarate, D-glucarate and various pentoses by species of (Dagley, S. & Trudgill, P. W.) 48
Pseudomonas methanica, methane- and methanol-grown, synthesis of cell constituents by (Johnson, P. A. & Quayle, J. R.) 859
Pseudomonas ovalis, kephalin requirement for L-malate oxidase of (Francis, M. J. O. & Phizackerley, P. J. R.) 25P
Pseudomonas, oxidative metabolism of phenanthrene and anthracene by soil strains of (Evans, W. C., Fernley, H. N. & Griffiths, E.) 819
Pseudomonas, soil, a cell-free perhydroxylase system from, with activity on aromatic hydrocarbons (Griffiths, E. & Evans, W. C.) 51P
Pseudomonas, soil, metabolism of quinol and resorcinol by (Larway, P. & Evans, W. C.) 52P
Pseudomonas species, degradation of catechol by (Dagley, S. & Gibson, D. T.) 466
Pyridoxal phosphate, binding of, and substrates to aspartate–2-oxoglutarate aminotransferase (Fasella, P.) 2P
Pyridoxal phosphate, conversion of pyridoxine phosphate into, in *Escherichia coli* (Henderson, H. M.) 775
Pyridoxal phosphate, regulation and function of enzymes dependent on (Turner, J. M.) 3P
Pyridoxine deficiency, effect of, on nucleic acid metabolism in the rat (Trakatellis, A. C. & Axelrod, A. E.) 344
Pyridoxine phosphate, conversion of, into pyridoxal phosphate in *Escherichia coli* (Henderson, H. M.) 775
Pyruvate, effects of adenine nucleotides on metabolism of, in rat liver (Berry, M. N.) 587
Pyruvate, synthesis of glycogen from, in muscle (Mahler, R.) 47P
Quinol, metabolism of, by soil *Pseudomonas* (Larway, P. & Evans, W. C.) 52P
Resorcinol, metabolism of, by soil *Pseudomonas* (Larway, P. & Evans, W. C.) 52P
Rhodanese, properties of a sub-unit of, from *Thiobacillus denitrificans* (Bowen, T. J., Butler, P. J. & Happold, F. C.) 5P
Rhodospirillum rubrum, photoassimilation of succinate to hexose by (Evans, M. C. W.) 669
Rhodospirillum rubrum, photo-oxidation of succinate by chromatophores of (Evans, M. C. W.) 661
Ribonuclease, extracellular formation of, in *Bacillus subtilis* and its stimulation by actinomycin D (Coleman, G. & Elliott, W. H.) 699
Ribonucleic acid bacteriophages, determination of base ratios of, specific to *Escherichia coli* (Bishop, D. H. L. & Bradley, D. E.) 82
Ribonucleic acid, messenger, and haemoglobin biosynthesis (Arnstein, H. R. V., Cox, R. A. & Gould, H.) 62P
Ribonucleic acid polymerase, characterization of the product of, from isolated rat-liver nuclei (Widnell, C. C.) 42P
Ribonucleic acid, synthesis of, by liver cells in suspension (Jacob, S. T. & Bhargava, P. M.) 568
Ribonucleic acids, hydration of (Lewin, S.) 44P
Ribonucleosides, 5′-ribonucleotides and ribonucleic acid, periodate-oxidized, reaction of, with isoniazid (Hunt, J. A.) 541
Ribosome, function of, in reticulocyte haemoglobin synthesis (Marks, P. A., Rifkind, R. A., Conconi, F. & Perl, W.) 62P
Ribosomes, synthesis of, by a mutant of *Escherichia coli* (Turnock, G. & Wild, D. G.) 597
Ribosomes, terminal sequences in ribonucleic acid of (Hunt, J. A.) 541
Ricinoleic acid, biosynthesis of (James, A. T., Hadaway, H. C. & Webb, J. P. W.) 448
Riley's plasma enzyme elevating virus (RV), effect of, on control of plasma enzyme levels in mice (Mahy, B. W. J., Rowson, K. E. K. & Parr, C. W.) 19P
Ring-fission mechanism for oxidative metabolism of phenanthrene and anthracene by soil pseudomonads (Evans, W. C., Fernley, H. N. & Griffiths, E.) 819
Rubidium ions, effect of, on the action of gramicidin on isolated liver mitochondria (Chappell, J. B. & Crofts, A. R.) 393
Sarkomycin, effect of, on deoxyribonucleic acid nucleotidyltransferase (Keir, H. M. & Shepherd, J. B.) 483
L-Serylglycine *O*[^{35}S]-sulphate in the rat (Tudball, N., Noda, Y. & Dodgson, K. S.) 678
Sialic acid, estimation of deoxyribonucleic acid in the presence of (Croft, D. N. & Lubran, M.) 612
Skeletal structure in insects (Rudall, K. M.) 38P
Skin, calf, thermal denaturation of soluble collagen from (Tristram, G. R., Worrall, J. & Steer, D. C.) 350
Snake venom, nature of enzyme–substrate complexes formed with L-amino acid oxidase of (Zeller, E. A., Ramachander, G., Fleisher, G. A., Ishimaru, T. & Zeller, V.) 262
Sodium, maintenance, change on stimulation and subsequent recovery of, of cerebral tissues (Keesey, J. C., Wallgren, H. & McIlwain, H.) 289
Sodium, radioactive, movements of, in cerebral cortex slices in response to electrical stimulation (Keesey, J. C. & Wallgren, H.) 301
Sodium ions, effect of, on the action of gramicidin on isolated liver mitochondria (Chappell, J. B. & Crofts, A. R.) 393
Soil micro-organisms, hydrolysis of fibrous cotton and reprecipitated cellulose by cellulolytic enzymes from (Halliwell, G.) 270

Soil pseudomonads, ring-fission mechanism for oxidative metabolism of phenanthrene and anthracene (Evans, W. C., Fernley, H. N. & Griffiths, E.) 819
Soya beans, purification and characterization of β-amylase from (Gertler, A. & Birk, Y.) 621
Staphylococcus aureus (Oxford), rapid extraction of phosphorus during periodate oxidation of isolated cell walls of (Garrett, A. J.) 6C
Staphylococcus lactis, new kind of teichoic acid from the cell walls of a strain of (Archibald, A. R., Baddiley, J. & Button, D.) 8C
Steroid sulphates, neutral formation of, by a feminizing Leydig cell tumour from a human subject (Pierrepoint, C. G., Griffiths, K., Grant, J. K. & Stewart, J. S. S.) 55P
Steroids, urinary, systematic analysis of (Menini, E. & Norymberski, J. K.) 1
Succinate–cytochrome *c* reductase, activity of, in the heart and liver of the prenatal and postnatal rat (Lang, C. A.) 365
Succinate, photoassimilation of, to hexose by *Rhodospirillum rubrum* (Evans, M. C. W.) 669
Succinate, photo-oxidation of, by chromatophores of *Rhodospirillum rubrum* (Evans, M. C. W.) 661
Sweet corn, enzymic transfer of (1→6)-linked α-maltosyl residues by an enzyme preparation from (Taylor, P. M. & Whelan, W. J.) 26P
Sweet potato, an enzymic impurity in crystalline β-amylase of (Lee, E. Y. C. & Whelan, W. J.) 27P
Syringyl artificial lignin, properties of (Bland, D. E. & Logan, A. F.) 515

Teichoic acid, a new kind of, from the cell walls of a strain of *Staphylococcus lactis* (Archibald, A. R., Baddiley, J. & Button, D.) 8C
Teichoic acids, extraction of, from bacterial walls with phenylhydrazine and its significance for the nature of their linkage with glycosaminopeptides (Archibald, A. R. & Baddiley, J.) 19C
Thiobacillus denitrificans, properties of the rhodanese subunit from (Bowen, T. J., Butler, P. J. & Happold, F. C.) 5P
Thiol groups in deoxyribonucleic acid nucleotidyltransferase (Keir, H. M. & Shepherd, J. B.) 483
Thiol reagents, inhibition of the uridine diphosphate-transglucuronylase in mouse-liver homogenates by (Storey, I. D. E.) 201
Threonine dehydratase of sheep liver (Moss, G., Russell, D. H., Thain, E. M. & Vernon, C. A.) 3P
Thymus gland, rat, metabolic and chemical properties of basic proteins isolated from nuclei of (Ord, M. G., Raaf, J. H., Smit, J. A. & Stocken, L. A.) 321
Thyroid-stimulating hormone, administration of, and influence of diet on intrathyroidal iodine metabolism in the rat (Barnaby, C. F., Davidson, A. M. & Plaskett, L. G.) 811
Tobacco mosaic virus, uptake of, and nuclear cytoplasmic relationships in isolated tomato fruit protoplasts (Cocking, E. C.) 28P
Transport, active, in insects (Treherne, J. E.) 35P
2,4,6-Tri-(3′,5′-di-*tert.*-butyl-4′-hydroxybenzyl)mesitylene (Ionox 330) in the dog and rat (Wright, A. S., Crowne, R. S. & Hathway, D. E.) 98
Triose phosphate isomerase, evidence for extracellular activity of, in the isolated perfused rat heart (Williamson, J. R. & DiPietro, D. L.) 226
Tryptophan, aspects of metabolism of (Scott, T. A.) 1P
L-Tyrosyl-L-alanine, biological sulphation of (Jones, J. G., Scotland, S. M. & Dodgson, K. S.) 19P
L-Tyrosylglycine, biological sulphation of (Jones, J. G., Scotland, S. M. & Dodgson, K. S.) 17C

Udder, goat, perfused, isolated, formation and fate of acetyl groups from glucose in (Hardwick, D. C.) 46P
Udder, goat, perfused, isolated, incorporation of carbon dioxide into milk citrate in (Hardwick, D. C.) 233
Urea, isotopic studies of metabolism of, in rabbits (Regoeczi, E., Irons, L., Koj, A. & McFarlane, A. S.) 521
Urea, models and theory for metabolism of (Charlwood, P. A.) 533
Uridine diphosphate transglucuronylase, differences in the conjugation of *o*-aminophenol and *p*-nitrophenol by, in mouse-liver homogenates (Storey, I. D. E.) 209
Uridine diphosphate transglucuronylase, inhibition of, in mouse-liver homogenates by thiol reagents (Storey, I. D. E.) 201
Urine, human, systematic analysis of steroids from (Menini, E. & Norymberski, J. K.) 1
Urine, method for the estimation of 6-oxygenated metabolites of progesterone in (James, F. & Fotherby, K.) 459

Valone (2-isovalerylindane-1,3-dione), action of, on respiration and phosphorylation in blowfly (*Calliphora erythrocephala*) flight-muscle sarcosomes (Ray, J. W.) 40P
Vitamin A and isoprenoid synthesis in the rat (Diplock, A. T., Green, J. & Bunyan, J.) 138
Vitamin A epoxides, preparation and properties of (Jungalwala, F. B. & Cama, H. R.) 17
Vitamin A, rat tissue lipids and effect of excess of (Misra, U. K.) 30P
Vitamin B_{12} deficiency, effect of, on the excretion of propionic acid by the human (White, A. M.) 17P
Vitamin B_{12} deficiency, metabolism of lipid in, in the chick embryo (Noble, R. C. & Moore, J. H.) 144
Vitamin B_6, enzymic and metabolic alterations in deficiency of (Wiss, O.) 1P

Xylulose, effect of starvation in various animals on the synthesis of, from glucuronolactone and gulonate (Stirpe, F., Comporti, M. & Della Corte, E.) 363
Xylulose, effect of starvation on the enzymes for the synthesis of, from glucuronic acid (Stirpe, F. & Comporti, M.) 354

Yeast, baker's, normal, reduction of 5-oxodecanoic acid by (Francke, A.) 633
Yeast, features of cell-wall structure of, revealed by the action of enzymes from a non-fruiting myxobacterium (Bacon, J. S. D., Milne, B. D., Taylor, I. F. & Webley, D. M.) 28C

Zinc, effect of deficiency of, on the incorporation of ^{32}P into rat-liver nucleotides *in vivo* (Williams, R. B., Mills, C. F., Quarterman, J. & Dalgarno, A. C.) 29P
Zinc, equilibrium-dialysis study of binding of, to insulin (Summerell, J. M., Osmand, A. & Smith, G. H.) 31P
Zinc ions, activation of intestinal alkaline β-glycerophosphatase by (Clark, B. & Porteous, J. W.) 475
